

**Home Learning
Menu Year 5 Term 3:
Why do Oceans
matter?**

How it Works

Homework is a great addition to your child's learning and an opportunity to consolidate and stretch their minds.

Weekly tasks have a positive impact across all lessons and so **should** be completed multiple times a week. **Bonus** tasks are optional, termly and can be completed to stretch and consolidate your child's knowledge of our varied curriculum.

Occasionally your child may come home with **targeted** homework to help in a particular area. As well as enhancing your child's learning homework is a great opportunity to earn **extra dojo points**; all you have to do is record it in their homework book. Your child's weekly spelling results will also be communicated back to you using this book.

Weekly Tasks	
Reading	Keep a record of every time you read with someone. When you finish a book you can complete a book review bookmark and display it in your classroom. Challenge: Can you find a word that your teacher doesn't know the meaning of?
Spelling Practice	Use spelling frame or your homework book to practise the rules you have learned for your weekly spelling test.
Times Tables Practice	Use Times Tables Rock Stars or have a family member test your recall. This will help you improve in your maths lessons.
Life Skills	This is an opportunity for you to share what you have done outside of school e.g Karate, Scouts, Dance class, cooking or baking. Just jot a small bit about it in your homework book; we love to read about all the amazing things you do outside of school!
Bonus Tasks	
Geography – Oceans	Use your learning from class and additional research to create an informative poster on how to save our oceans. This will be displayed in school. With an adult, go to a local beach and use litter picking equipment to safely clean your beach. Record the different types of litter in your homework book to share with your class.
Science – Earth and Space	Create your own model of the solar system. You can use whatever medium you like (computer, drawing, junk model).
Art - Movement	With permission, follow this link to a lesson on drawing a running figure. Follow the tips to draw your own running figure in your homework book. https://www.youtube.com/watch?v=ByUROVG3b9M
French	CNES is the French equivalent of NASA. Write (in English) a short non-chronological report about what they have achieved, which other countries they have worked with, the names of any French astronauts etc. illustrate your report with pictures.
