

# Food Glorious Food Term 5

## Key Vocabulary

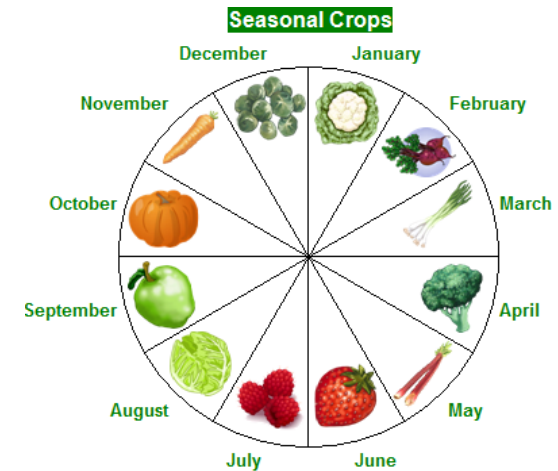

<i>Arable farming</i>	Growing crops such as potatoes or wheat.
<i>pastoral farming</i>	Lands is used for animals grazing.
<i>mixed farming</i>	When some crops are grown and some animals are raised.

Food is produced by farming. In the UK, arable farming produces crops (plants) which we then eat. Pastoral farming raises some animals for meat. Humans are *omnivores* and need a balanced diet of both crops and meat.

Food goes on a long journey to get from the farms to our tables. The farms, roads, shops and factories are all *human geography* features.

The *weather* can impact how the crops grow. Some crops only grow at certain times of the year. They are known as *seasonal produce*.
